

ARTHUR KUPRIYANOV

Software Engineer

@ apploidyakutsk@gmail.com t.me/OxOOFFAB github.com/kupriyanov-arthur linkedin.com/in/kupriyanov-arthur

SUMMARY

Software Engineer with 6+ years of experience building full-stack web applications with Java, React, and TypeScript. Shipped production systems at Sberbank serving hundreds of thousands of users. Experienced in microservice architectures, message brokers, and modern frontend frameworks. Hands-on with LLM integration, RAG pipelines, and semantic search. Value clean code, solid engineering practices and clear communication within cross-functional teams.

WORK EXPERIENCE

Unallocated Metal Accounts, **SBERBANK**,

Apr 2024 – Present

Built the web platform for a product that attracted **450K+ new accounts** and **RUB 46 bn in investments** in 2025 alone. Built on Spring Microservices with Kafka on OpenShift. Responsible for the entire customer-facing web frontend consisting of 5 micro-frontend projects, fully rewritten for the new design system. Handled both legacy maintenance and integration of new technologies aligned with fintech trends. 14-person cross-functional team including mobile developers, analysts, QA, and designers.

Java · Spring Boot · Spring Microservices · React · TypeScript · Kafka · OpenShift · Docker · Kubernetes · Nginx

Cash Operations, **SBERBANK**,

2024

Transferred after an internal interview. Developed backend cash ordering, valuables management, and branch operations tracking as part of the core banking system.

Java · Spring Boot · SQL

Senior Development Engineer, **BELL INTEGRATOR**,

Apr 2024 – Present

- › Implemented PII masking for logging across microservices
- › Integrated an AI coding agent using MCP
- › Built new service integrations via Kafka
- › Rewrote 4 micro-frontend modules for the design system migration
- › Published and maintained a shared UI library in the internal package registry
- › Configured OpenShift deployments and local stub environments for frontend-backend development
- › Set up Allure TestOps for automated test reporting
- › Led acceptance testing and release management
- › Conducted code reviews across Java and React codebases; performed refactoring across Java, Spring, React, and TypeScript
- › Investigated production bugs through log analysis and customer reports

Java · Spring Boot · React · TypeScript · Kafka · OpenShift · Docker · Kubernetes · Allure TestOps · JUnit

Full-Stack Developer, **SHARK IT COMPANY**, Russia

Mar 2019 – Apr 2024

Full-cycle application development from greenfield projects to maintaining existing solutions. Primary stack: Spring Boot and React/Next.js.

- › System architecture design and end-to-end technical implementation for a news publishing platform serving multiple media outlets
- › Full-stack development of user and admin panels with interactive media features: widgets, short-form video, content sliders
- › Real-time messaging and reader-to-publisher communication module
- › Leading a team of developers
- › Payment processing integration (YooKassa) and ModulKassa (fiscal hardware compliance)
- › Cloud deployment and infrastructure on Yandex Cloud
- › Custom handwritten text recognition pipeline using PostgreSQL and AWS S3
- › Push notification system for content updates
- › Legacy code maintenance and incremental modernization

Java · Spring Boot · React · Next.js · AWS · Nuxt · TypeScript · Vite · TailwindCSS · Kafka · RabbitMQ · Redis · MongoDB · Docker

 SKILLS

Backend	Java, Spring Boot, Spring Microservices, Kafka, RabbitMQ, Redis, MongoDB, SQL, REST, Web-Socket, JWT, Firebase, FCM
Frontend	React, Nuxt, Next.js, TypeScript, Vite, TailwindCSS, SCSS, Bootstrap
AI Engineering	LLM APIs, RAG, Embeddings, Vector Search, Semantic Search, Prompt Engineering, Privacy-preserving AI
DevOps	Docker, Docker Compose, Kubernetes, OpenShift, AWS, Nginx, Unix, Git, Maven
Testing	TDD, JUnit, Allure TestOps
Languages	Russian (Native), English (Fluent)

 PERSONAL PROJECTS

SYSTEM OF RETRYABLE CHAIN TASKS, [Tinkoff](#), St.Petersburg, Russia 2022
Implemented a Java Spring library for delayed and retryable execution of task chains (similar to **Quartz**), supporting configurable retries, delays, metrics, and REST-based task management.
➤ Job success rate **increased to 99.9%** and recovery time **reduced by 50%**.
[Kotlin](#) · [Spring](#) · [Task Scheduler](#) · [Quartz](#)

 EDUCATION

2018 – 2022 Bachelor’s Degree, System and Applied Software Engineering @ [ITMO University](#), St. Petersburg, Russia
