

ARTHUR KUPRIYANOV
Software Engineer

@ apploidyakutsk@gmail.com t.me/OxOOOFFAB github.com/kupriyanov-arthur linkedin.com/in/kupriyanov-arthur

SUMMARY

Software Engineer with 6+ years of experience building full-stack web applications with Java, React, and TypeScript. Experienced in microservice architectures, message brokers, and modern frontend frameworks, with hands-on LLM integration, RAG pipelines, and semantic search.

WORK EXPERIENCE

Senior Development Engineer, SBERBANK, Apr 2024 – Present

Built the web platform for Unallocated Metal Accounts - a product that attracted 450K+ new accounts and RUB 46 bn in investments in 2025 alone.

- Responsible for the entire customer-facing web frontend: 5 micro-frontend projects, fully rewritten for the new design system
- Developed backend for cash ordering, valuables management, and branch operations tracking
- Integrated an AI coding agent using MCP
- Published and maintained a shared UI library in the internal package registry
- Configured OpenShift deployments and local stub environments for frontend-backend development
- Set up Allure TestOps for automated test reporting
- Led acceptance testing and release management
- Conducted code reviews across Java and React codebases
- Performed refactoring across Java, Spring, React, and TypeScript
- Investigated production bugs through log analysis and customer reports

Java · Spring Boot · Spring Microservices · React · TypeScript · Kafka · OpenShift · Docker · Kubernetes · Nginx · Allure TestOps · JUnit

Full-Stack Developer, SHARK IT COMPANY, Mar 2019 – Apr 2024

Full-cycle application development from greenfield projects to maintaining existing solutions. Primary stack: Spring Boot and React/Next.js.

- System architecture design and end-to-end technical implementation for a news publishing platform serving multiple media outlets
- Full-stack development of user and admin panels with interactive media features: widgets, short-form video, content sliders
- Real-time messaging and reader-to-publisher communication module
- Leading a team of developers
- Payment processing integration (YooKassa) and ModulKassa (fiscal hardware compliance)
- Cloud deployment and infrastructure on Yandex Cloud
- Custom handwritten text recognition pipeline using PostgreSQL and AWS S3
- Push notification system for content updates
- Legacy code maintenance and incremental modernization

Java · Spring Boot · React · Next.js · AWS · Nuxt · TypeScript · Vite · TailwindCSS · Kafka · RabbitMQ · Redis · MongoDB · Docker

SKILLS

Backend	Java, Spring Boot, Spring Microservices, Kafka, RabbitMQ, Redis, MongoDB, SQL, REST, Web-Socket, JWT, Firebase, FCM
Frontend	React, Nuxt, Next.js, TypeScript, Vite, TailwindCSS, SCSS, Bootstrap
AI Engineering	LLM APIs, RAG, Embeddings, Vector Search, Semantic Search, Prompt Engineering, Privacy-preserving AI
DevOps	Docker, Docker Compose, Kubernetes, OpenShift, AWS, Nginx, Unix, Git, Maven
Testing	TDD, JUnit, Allure TestOps
Languages	Russian (Native), English (Fluent)

PERSONAL PROJECTS

NIRQ - AI-POWERED NEWS AGGREGATOR,

2025 – PRESENT

Telegram bot and web platform for personalized AI-driven news digests. Automatically aggregates RSS feeds from Telegram channels, generates semantic summaries, and delivers personalized digests.

- › Spring Boot backend with PostgreSQL, Redis, and Docker Compose
- › RAG pipeline: embeddings (pgvector, HNSW), semantic search, AI-powered digest generation
- › Multi-provider LLM routing with automatic fallback (OpenAI, GLM, Ollama)
- › Privacy-first architecture: anonymous usage, no user profiling, encrypted AI inference
- › Payment integration via YooKassa and Telegram Stars

Java · Spring Boot · PostgreSQL · pgvector · Redis · Docker · Telegram Bot API · LLM APIs · Python ·

EDUCATION

2018 – 2022 Bachelor's Degree, System and Applied Software Engineering @ **ITMO University**, St. Petersburg, Russia
