PERSON

SUMMARY

Software Engineer with 6+ years of experience building full-stack web applications with Java, React, and TypeScript. Shipped production systems at Sberbank serving hundreds of thousands of users. Experienced in microservice architectures, message brokers, and modern frontend frameworks. Hands-on with LLM integration, RAG pipelines, and semantic search. Value clean code, solid engineering practices and clear communication within cross-functional teams.

BRIEFCASE

WORK EXPERIENCE

Senior Development Engineer, SBERBANK, Apr 2024 – Present

➤ Built the web platform for **Unallocated Metal Accounts** — a product that attracted **450K+ new accounts** and **RUB 46 bn in investments** in 2025 alone

➤ Responsible for the entire customer-facing web frontend consisting of 5 micro-frontend projects, fully rewritten for the new design system

➤ Developed backend cash ordering, valuables management, and branch operations tracking as part of the core banking system

➤ Built on Spring Microservices with Kafka on OpenShift. 14-person cross-functional team including mobile developers, analysts, QA, and designers

➤ Integrated an AI coding agent using MCP; published and maintained a shared UI library in the internal package registry

➤ Configured OpenShift deployments and local stub environments for frontend-backend development

➤ Set up Allure TestOps for automated test reporting; led acceptance testing and release management

➤ Conducted code reviews across Java and React codebases; performed refactoring across Java, Spring, React, and TypeScript

➤ Investigated production bugs through log analysis and customer reports

Java · Spring Boot · Spring Microservices · React · TypeScript · Kafka · OpenShift · Docker · Kubernetes · Nginx · Allure TestOps · JUnit

Full-Stack Developer, SHARK IT COMPANY, Russia Mar 2019 – Apr 2024

Full-cycle application development from greenfield projects to maintaining existing solutions. Primary stack: Spring Boot and React/Next.js.

➤ System architecture design and end-to-end technical implementation for a news publishing platform serving multiple media outlets

➤ Full-stack development of user and admin panels with interactive media features: widgets, short-form video, content sliders

➤ Real-time messaging and reader-to-publisher communication module

➤ Leading a team of developers

➤ Payment processing integration (YooKassa) and ModulKassa (fiscal hardware compliance)

➤ Cloud deployment and infrastructure on Yandex Cloud

➤ Custom handwritten text recognition pipeline using PostgreSQL and AWS S3

➤ Push notification system for content updates

➤ Legacy code maintenance and incremental modernization

Java · Spring Boot · React · Next.js · AWS · Nuxt · TypeScript · Vite · TailwindCSS · Kafka · RabbitMQ · Redis · MongoDB · Docker

CODE

SKILLS

Backend	Java, Spring Boot, Spring Microservices, Kafka, RabbitMQ, Redis, MongoDB, SQL, REST, Web-Socket, JWT, Firebase, FCM
Frontend	React, Nuxt, Next.js, TypeScript, Vite, TailwindCSS, SCSS, Bootstrap
AI Engineering	LLM APIs, RAG, Embeddings, Vector Search, Semantic Search, Prompt Engineering, Privacy-preserving AI
DevOps	Docker, Docker Compose, Kubernetes, OpenShift, AWS, Nginx, Unix, Git, Maven
Testing	TDD, JUnit, Allure TestOps
Languages	Russian (Native), English (Fluent)

MONITOR

PERSONAL PROJECTS

NIRQ — AI-POWERED NEWS AGGREGATOR, [GitHub](#)

2025 – PRESENT

Telegram bot and web platform for personalized AI-driven news digests. Automatically aggregates RSS feeds from Telegram channels, generates semantic summaries, and delivers personalized digests.

- Spring Boot backend with PostgreSQL, Redis, and Docker Compose
- RAG pipeline: embeddings (pgvector, HNSW), semantic search, AI-powered digest generation
- Multi-provider LLM routing with automatic fallback (OpenAI, GLM, Ollama)
- Privacy-first architecture: anonymous usage, no user profiling, encrypted AI inference
- Payment integration via YooKassa and Telegram Stars

[Java](#) · [Spring Boot](#) · [PostgreSQL](#) · [pgvector](#) · [Redis](#) · [Docker](#) · [Telegram Bot API](#) · [LLM APIs](#) · [Python](#)

RETRYABLE TASK CHAIN LIBRARY, [Tinkoff](#), St.Petersburg, Russia

2022

Implemented a Java Spring library for delayed and retryable execution of task chains (similar to **Quartz**), supporting configurable retries, delays, metrics, and REST-based task management.

- Job success rate **increased to 99.9%** and recovery time **reduced by 50%**.

[Kotlin](#) · [Spring](#) · [Task Scheduler](#) · [Quartz](#)

EDUCATION

2018 – 2022 Bachelor's Degree, System and Applied Software Engineering @ **ITMO University**, St. Petersburg, Russia
